

About the Yamaha Music School

For over 50 years, Yamaha Music School has helped more than 6 million students worldwide discover a lifelong love of music.

Designed for children ages 4–12, our group piano classes combine expert instruction with a friendly, encouraging environment—so kids learn, grow, and have fun together.

Fun & Engaging

Children learn music the way they naturally learn best—through songs, images, movement, and age-appropriate activities, while building confidence, creativity, and friendships.

High-Quality Education

Yamaha Music School graduates include performers, teachers, and music professionals around the world. Our globally respected curriculum and materials are widely regarded as among the best in music education.

Comprehensive Learning

Students learn to hear, play, read, and understand music, not just follow notes. Children are introduced to performance, improvisation, and composition, creating well-rounded young musicians.

Benefits Beyond Music

Music study supports intellectual, emotional, and physical development. Yamaha's approach nurtures focus, coordination, confidence, and a healthy love of learning—benefits that last far beyond the piano.
